25X1 3. [redacted] following rail shipments crossed the border en route from East Litovsk during the period from 14 through 18 June 1952: 25X1

Date in June	Load	Dispatched to
14	5 tanks	Fuerstenwalde (5)
	36 new trucks	Fuerstenberg/Oder (2)
15	9 tanks	5 to Leipzig 4 to Fuerstenwalde (5)
17	20 SP guns	direction of Berlin (11)
25X1A 18	18 rocket launchers	Cottbus (11)

[redacted] Comments:

- (1) All the ore shipments dispatched to Ziltendorf were for the Foundry Combine East near Fuerstenberg/Oder.
- (2) These shipments are connected with the vehicle exchange program under way since mid-February 1952.
- 25X1A (3) Deliveries by Soviet Zone hydrogenation plants to the U.S.S.R. and returning empty tank cars.
- (4) [redacted] belongs to the Inspectorate for Motor Transport (re is attached to the SCC. The Inspectorate was previously located in Potsdam, [redacted] observed in connection with vehicle shipments from the U.S.S.R. and throughout the Soviet Zone. [redacted] confirms the Hq 7th Bde Mecz Div in Fuerstenwalde, now at the Lieberose troop training grounds, until 17 June. The [redacted] listed in the report belong to previously known Soviet supply installations.
- 25X1A (5) The tank shipments are reported for the first time. The tanks observed on 13 June en route for Torgau, Eggesin, Brandenburg, and another undetermined location are believed to be for cadre units of the Volkspolizei stationed there. It cannot be determined whether the five tanks mentioned in paragraph 3 of the report as being dispatched to Leipzig were dispatched to the Volkspolizei cadre units stationed there. The tank shipments listed in paragraphs 2 and 3 as being dispatched to Fuerstenwalde are believed to be identical. They were probably delivered to the Fuerstenwalde depot. [redacted] belongs to the Hq 9th Bde Tank Div in Neustrelitz; however, it is possible that the tanks are later to be forwarded from Fuerstenwalde to this division and were for this reason consigned to the division headquarters.
- (6) Deliveries by Soviet Zone railroad car factories to the U.S.S.R. and returning standard-wheel sets.
- 25X1A (7) Grain shuttle trains. [redacted]
- (8) Possibly heavy-duty flatcars to be used for the shipment of tanks, SP guns, aircraft, or electric locomotives and power station equipment. [redacted]
- (9) Uranium ore shipments to the U.S.S.R. [redacted]
- (10) [redacted]
